

2019 FIA European Truck Racing Championship
Race of Nurburgring

From	The Technical Delegate	Technical Information N°2
To	All Competitors	Date: 20/07/2019

Safety:

For safety reasons, all trucks must have side windows closed while on the track.

However, the side windows can be opened with a maximum of 40 mm in the upper part.

Side windows may have holes up to 50 mm on the upper part of the window, but not lower than 80mm from the top of the window opening.

Exceptionally: Trucks with engine under cab may remove the window from the passenger side provided that the window is replaced by a proper net.

Carlos Barros
